DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/16/2007 has been entered.

Allowable Subject Matter

2. Claims 1-72 are allowed.

Regarding Claim 1, Dankberg, Hardy, and Razavi do not teach, alone nor in combination, a second sub-circuit which produces first and second single-ended replica transmission signals which together substantially comprise a replica of the first differential signal component of the composite differential signal, wherein when one of the first and second single-ended replica transmission signals is asserted, the other of the first and second single-ended replica transmission signals has a value of zero, and a third sub circuit, which is coupled to the first and second sub-circuits, and which produces the differential replica transmission signal from the first and second single-ended replica transmission signals, wherein the third sub-circuit includes only a single differential operational amplifier.

Claims 9, 17, 25, 33, 41, 49, 57, and 65 are allowable for similar reasons as claim 1.
